Please note that interval medication reviews and routine tests (e.g. blood tests/ECG/ 24-Hour Blood Pressure Monitor) are required for the prescribing of all long-term medication. The frequency of these tests will depend on your medical problem.

To get the most from your medication review with your doctor please ensure that any investigations have been completed in the weeks prior to your visit. It is also useful to bring your medication with you to your visit.

Please read the data sheet that accompanies your medication.

Remember that your doctor and pharmacist are available to discuss any queries you have in relation to your medication.
